José Gabriel Maza Mendoza

Software Engineer Fullstack · Backend + React / TypeScript

mazamendoza123@gmail.com (+57) 300 8420902 Barranquilla, Colombia github.com/Jgmaza
Portfolio: jgmaza.vercel.app

PROFESSIONAL PROFILE

Systems Engineer and fullstack software engineer with a strong backend focus on APIs, integrations, and data layers, while owning React / TypeScript UIs end to end. Recent public-sector work includes an interoperability gateway (APISIX + FastAPI) and NestJS bridges between ERP and plant systems. Comfortable with the full delivery cycle — design, implementation, quality, and deploy — and quick to adopt new stacks when the problem demands it.

PROFESSIONAL EXPERIENCE

09/2025 – Present
Barranquilla, Colombia

FullStack Developer
Ministerio de Minas y Energía
Building and maintaining several production tracks in parallel: (1) service integrator / interoperability gateway (APISIX + FastAPI + Vue) for exchange with external registries; (2) energy-surveillance platform (Angular + Node + SQL Server) with unified dosimetry across API, DB, and UI; (3) stakeholder-mapping app (FastAPI + React + MySQL) for structured decision support. Focus on reliable APIs, data consistency, and usable frontends under institutional constraints.

06/2025 – 08/2025
Barranquilla, Colombia

FullStack Developer
Guarapo Labs
Supported international client delivery and a new product spanning frontend, backend, and AI concepts. Built internal tools with Next.js and Supabase — turning product needs into interfaces wired to real data and workflows.

02/2025 – 05/2025
Barranquilla, Colombia

FullStack Developer · AI / automation
Clazz Dev
Designed AI-driven automation and custom assistants with OpenAI, n8n, FastAPI, and Python. Built backend orchestration services, integrated external APIs, and shipped automation pipelines for internal and client-facing processes — agents inside real workflows, not only chat UIs.

06/2024 – 01/2025
Barranquilla, Colombia

FullStack Developer
I-Cluster
Developed software for a municipal emotional-health initiative (Tolú) with React and Express. Collaborated cross-functionally on features that supported wellbeing programs, with emphasis on reliability and maintainable delivery.

04/2022 – 06/2024
Barranquilla, Colombia

FullStack Developer
Infinity Tech Consulting
Built and maintained fullstack web applications with Next.js, Flask, and Prisma — frontend and backend — deployed on AWS and Vercel. Owned data modeling, requirements/use-case documentation, responsive UIs, and Git-based quality practices across complex client projects.

11/2021 – 01/2022
Barranquilla, Colombia

Support
Sofin SAS
Managed electronic-invoicing error requests and conducted ERP code testing to improve production stability. Later returned as part-time freelance (≈2 months in 2026, concurrent with primary role) to build a NestJS SOAP/REST bridge between ERP and plant operations (orders, consumption, delivery close).

EDUCATION

2018 – 2022
Graduated 2022
Barranquilla, Colombia

Systems Engineer
Universidad del Norte
Distinction: Outstanding Student

SKILLS

Core: TypeScript, React, JavaScript, Java, Python, NestJS, FastAPI, Node/Express, REST APIs, SQL (MySQL, PostgreSQL, SQL Server), Git

Also used in production: Next.js, Vue 3, Angular, Prisma, Supabase, AWS, Vercel, APISIX / API gateways, SOAP integrations, n8n, HTML/CSS/Tailwind, Linux

ACHIEVEMENTS

2025

Winner — Hackathon Barranqui-IA / Código Abierto 2025

Fundación Código Abierto · MediAgent

Built MediAgent with a team: a voice agent that connects pharmacy inventory, electronic prescriptions, and patient intake (STT → LLM → TTS) to cut counter wait time when systems do not interoperate. The win recognized a scoped product pitch plus a working demo path; a follow-up degraded demo is published in the portfolio for walkthrough without 24/7 paid telephony.

LANGUAGES

English — EF SET B2
Spanish — Native

CERTIFICATIONS & COURSES

Certificate of Participation — “Build with AI”
Google Developers Group Barranquilla · 2025

React Query — DevTalles · 12/2023
HTML5 y CSS3 — Udemy · 07/2018
